

**RIDEM Office of Water Resources (OWR)**  
**COORDINATED STORMWATER PERMITTING GUIDANCE**

To which program should I submit a permit application?

Only **ONE application** is needed, even if a project is subject to multiple permits.  
Follow this flow diagram and submit an application to the first applicable program:

**Note:** The permit issued pursuant to this flowchart will include any additional authorizations that may be required under other pertinent regulations of the Office of Water Resources (OWR), except that for any industrial type project requiring a Multi-Sector (Stormwater) General Permit (MSGP), a separate MSGP application must also be filed with the RIPDES Program.
